Office of the
Controller of Technical Examinations
Kaimanam
Thiruvananthapuram

28th February 2018

CIRCULAR

Sub: Education – Technical – Examination – National Academic Depository (NAD) Alignment – Introduction of Aadhar Details – reg.

In order to align with the National Academic Depository (NAD), Aadhar details of the students have to be included in the examination database of the diploma pass outs. Hence it is decided to collect the Aadhar details of all candidates for the Diploma examinations, along with their examination registration.

Students are required to enter their Aadhar number through candidate's login. This has to be completed before doing the examination registration. Aadhar number verification can be done by the class tutors for the regular candidates (students in the roll of the institution) and examination clerk can verify the same for supplementary candidates. Without this the uploading of registrations can not be completed.

Principals are requested to ensure the correctness of Aadhar details. Class tutors should be properly instructed about the importance of the same. The Aadhar number of the candidate will be printed in the Diploma certificate issued.
